Tan Son Ward, Ho Chi Minh City, Vietnam

Education

Bachelor of Information Technology

2022 - 2026 (Waiting for degree)

FPT University

GPA: 7.51 / 10

Technical Skills

Programming Languages:

- JavaScript
- TypeScript
- HTML, CSS

Frontend:

Objective

Information Technology graduate seeking an entry-level Developer position to apply my skills in JavaScript. Passionate about enterprise systems and workflow automation, and eager to contribute to scalable business solutions while continuously improving my technical expertise.

Internship Experience

Software Developer Intern (On-the-Job Training)

09/2024 - 12/2024

FPT Software Academy - Ho Chi Minh City

- Developed frontend for an online course management web application.
- Built responsive UI using ReactJS and MUI.
- Integrated frontend with RESTful APIs.
- Managed state and handled data rendering from backend services.
- Collaborated with backend developers following Agile methodology.
- Achieved GPA 88.2/100 – Level A (Over Expectation).

Projects

Back2Use – QR-based Reusable Packing Management for F&B

09/2025 - 12/2025

BE Developer

Contributed to the backend development of a QR-based system for managing and tracking reusable packaging in F&B businesses.

- Implemented geospatial business search using MongoDB 2dsphere index and $geoNear aggregation.
- Developed borrow-return transaction lifecycle with condition tracking and penalty calculation.
- Built eco-reward system with leaderboard ranking using complex aggregation pipelines.
- Developed and deployed smart contracts on Polygon Testnet using Solidity and Ethers.js to store verified CO_2 reduction data with immutable on-chain transaction records.

Tech: NestJS, TypeScript, MongoDB, JWT, Socket.io, VNPay, MoMo, Ethers.js, Cloudinary
